ARTIFICIAL INTELLIGENCE

Course Lab Report

Lab 1

Graded Lab 1 – Python Programming

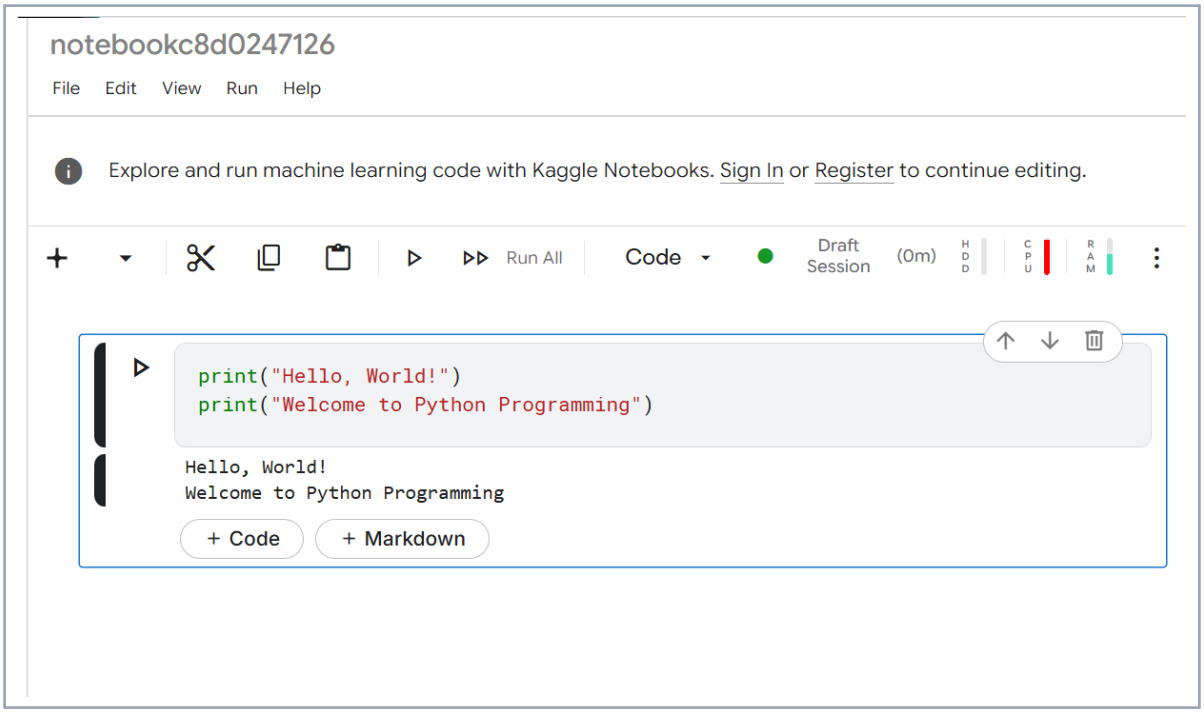

Foundations of Python: variables, data types, control flow, loops and data structures

SUBMITTED BY	Maira
STUDENT ID	41362
SUBMITTED TO	Mam Faiza Ali
COURSE	Artificial Intelligence

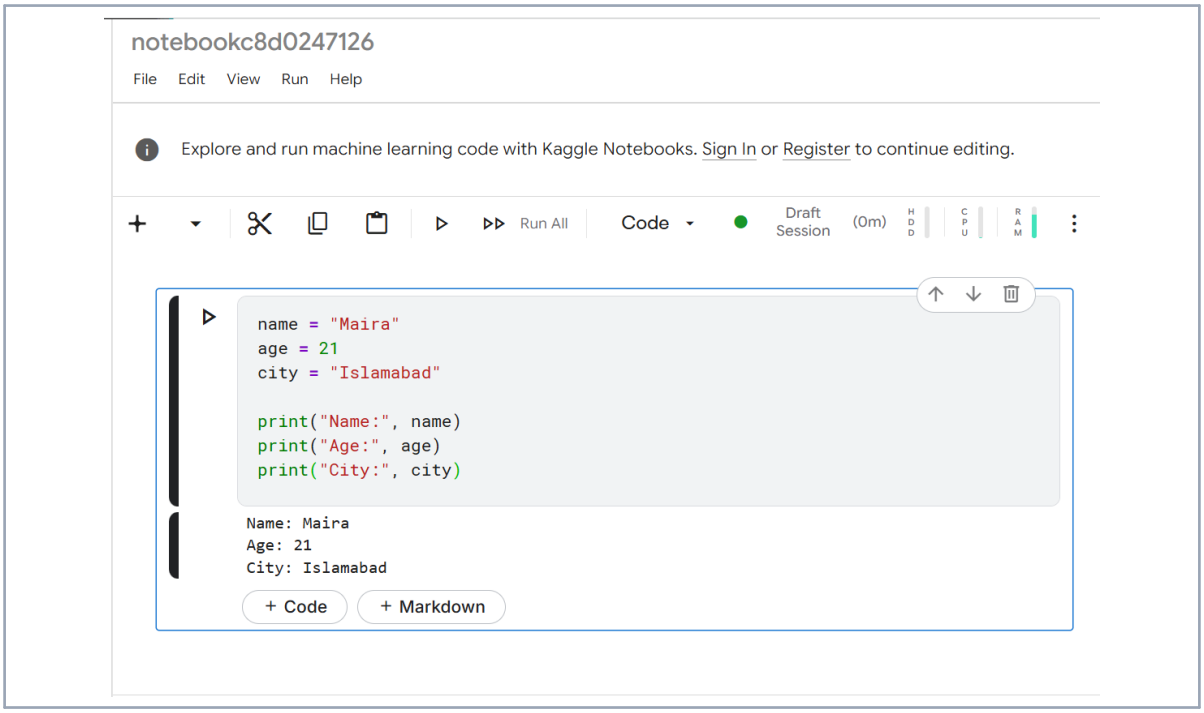

Graded Lab 1 – Python Programming

Practice of the foundation concepts of Python programming, completed in a Kaggle / Colab notebook and saved as a PDF for submission with a GitHub account.

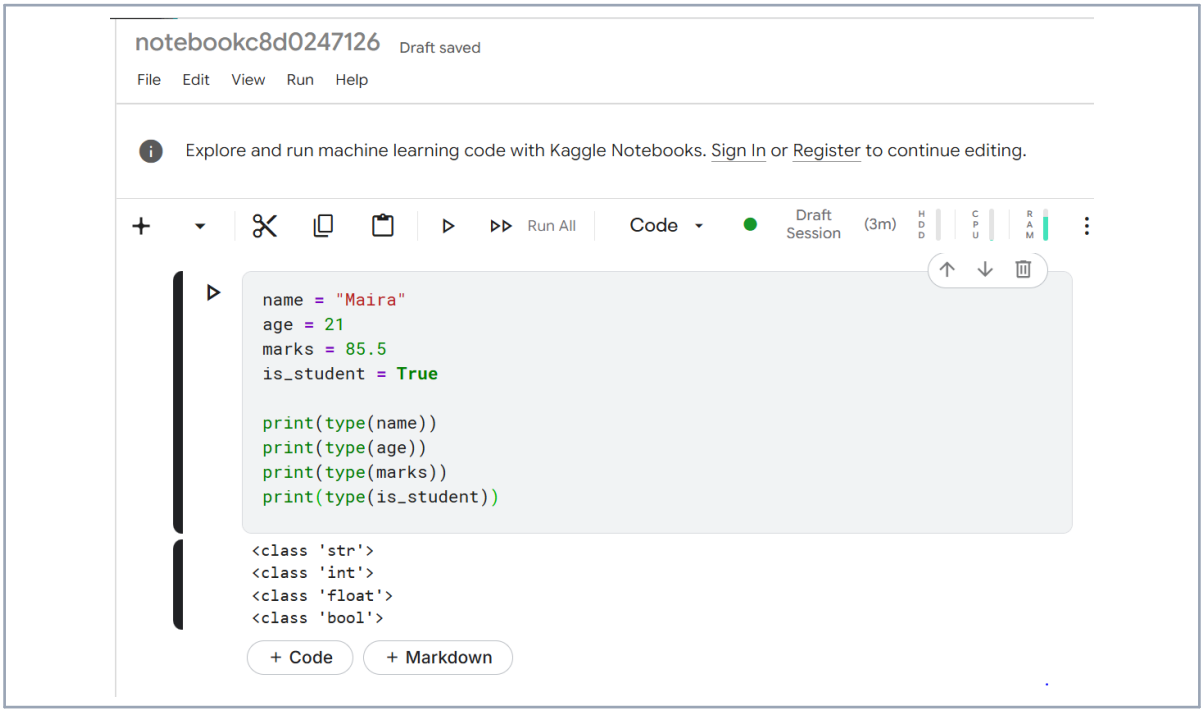

1. Hello World

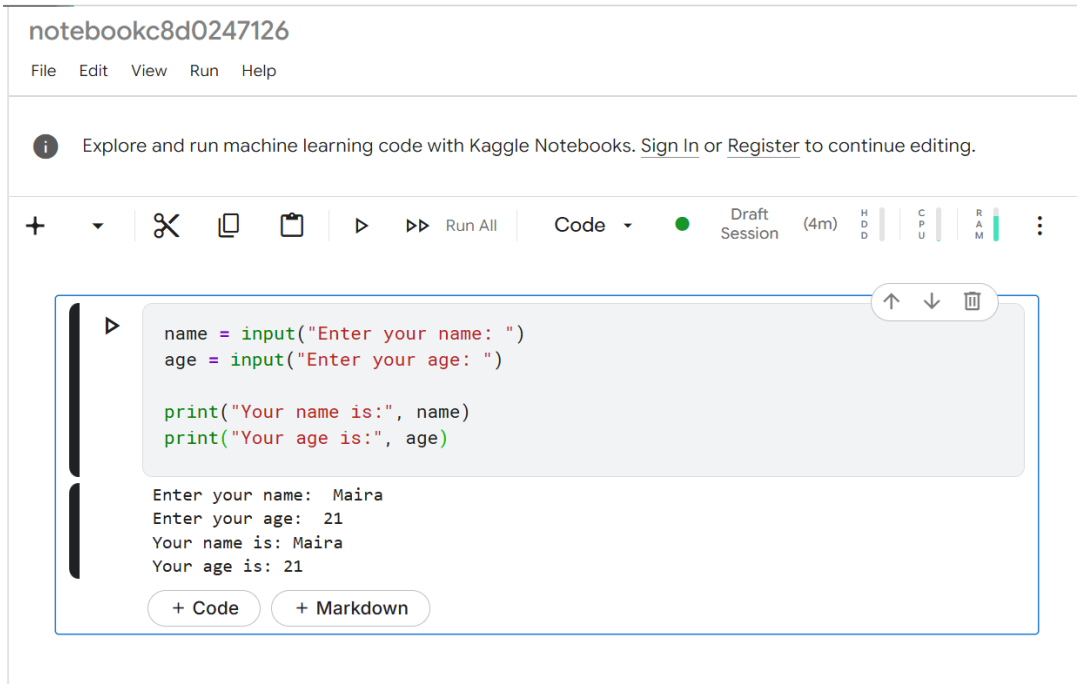

2. Variables

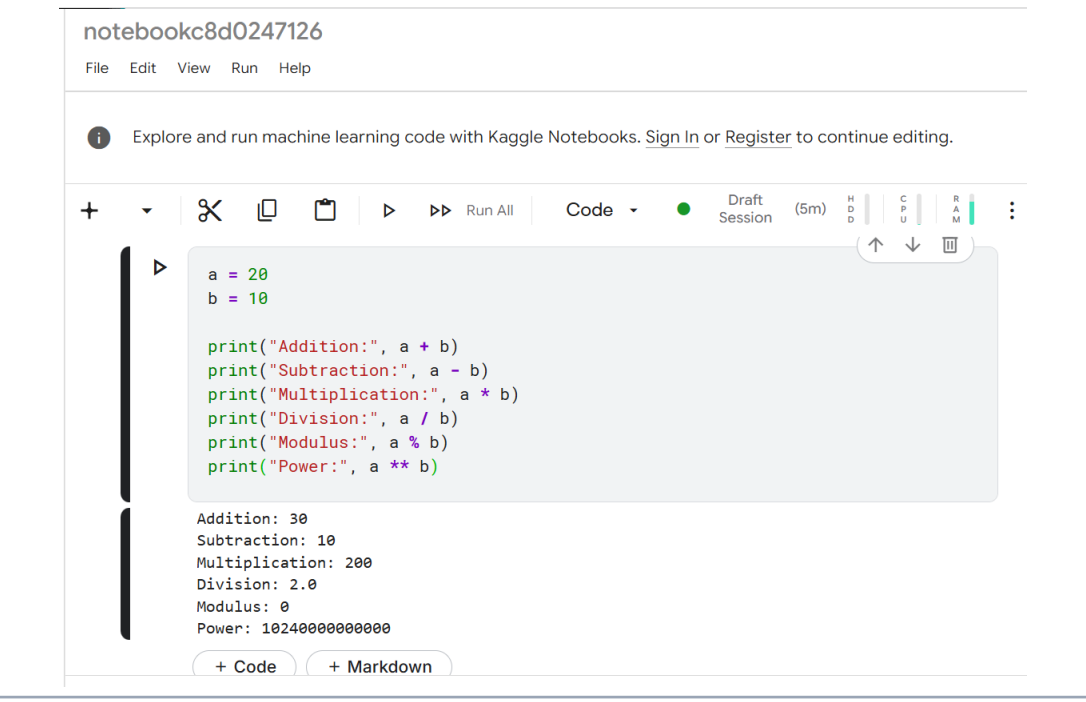

3. Data Types

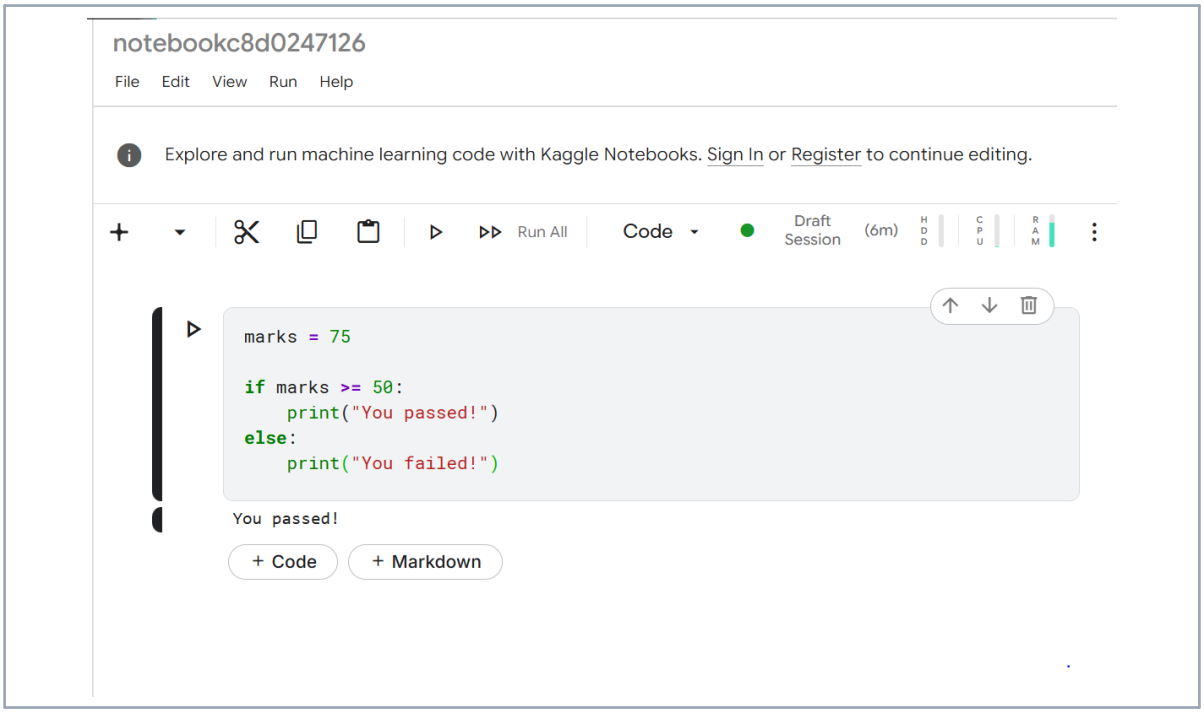

4. Input and Output

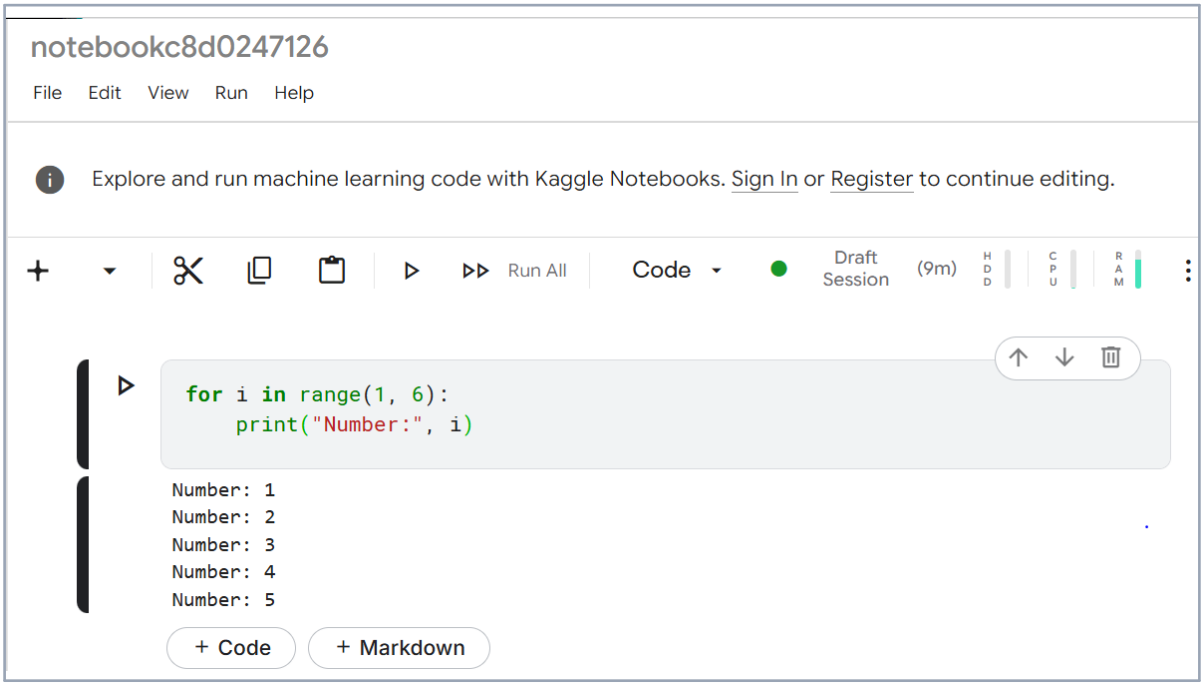

5. Arithmetic Operators

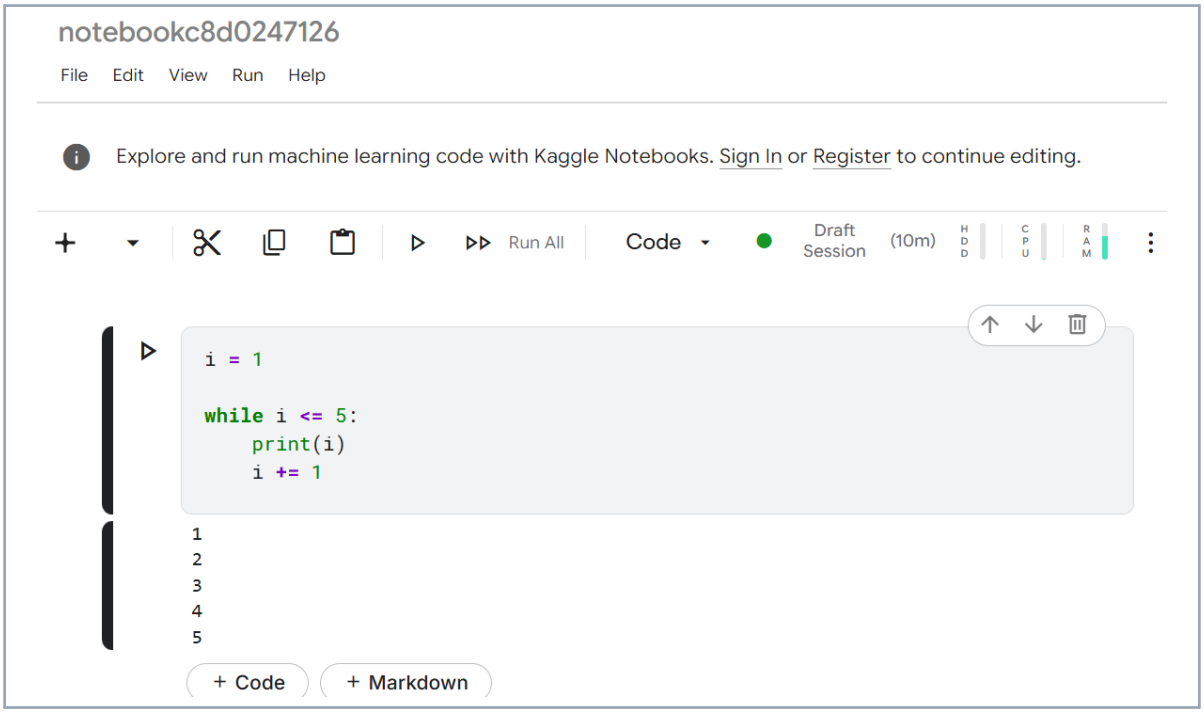

6. If-Else Statement

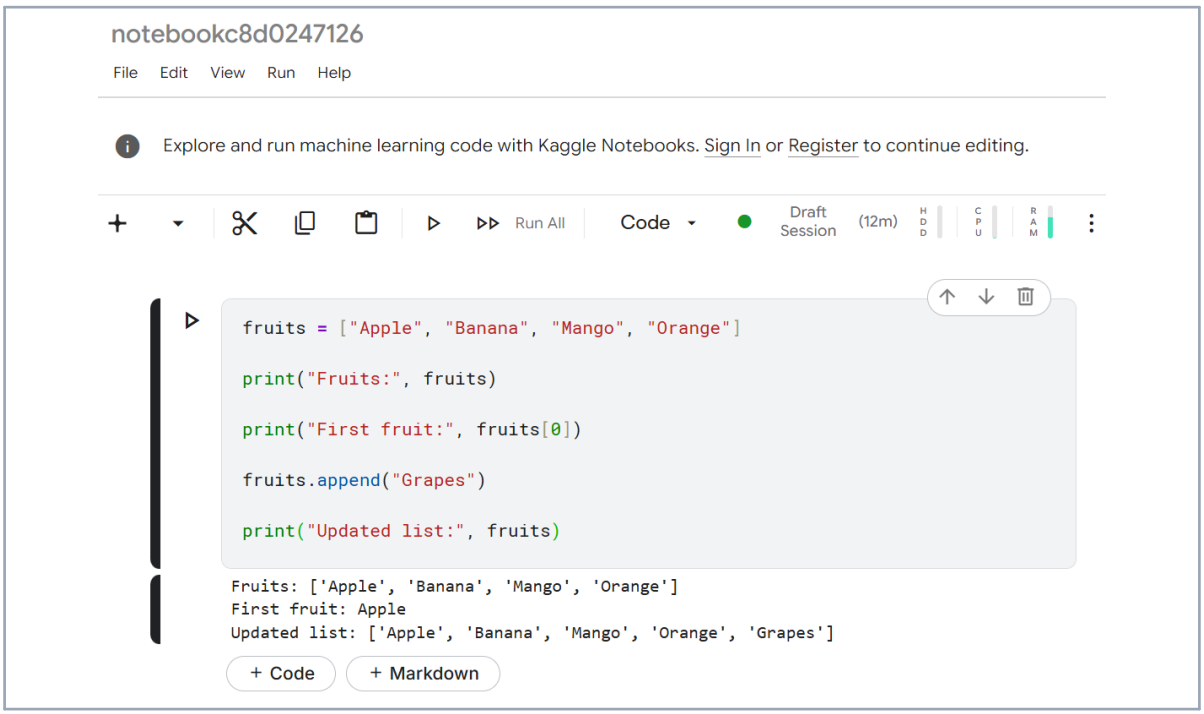

7. For Loop

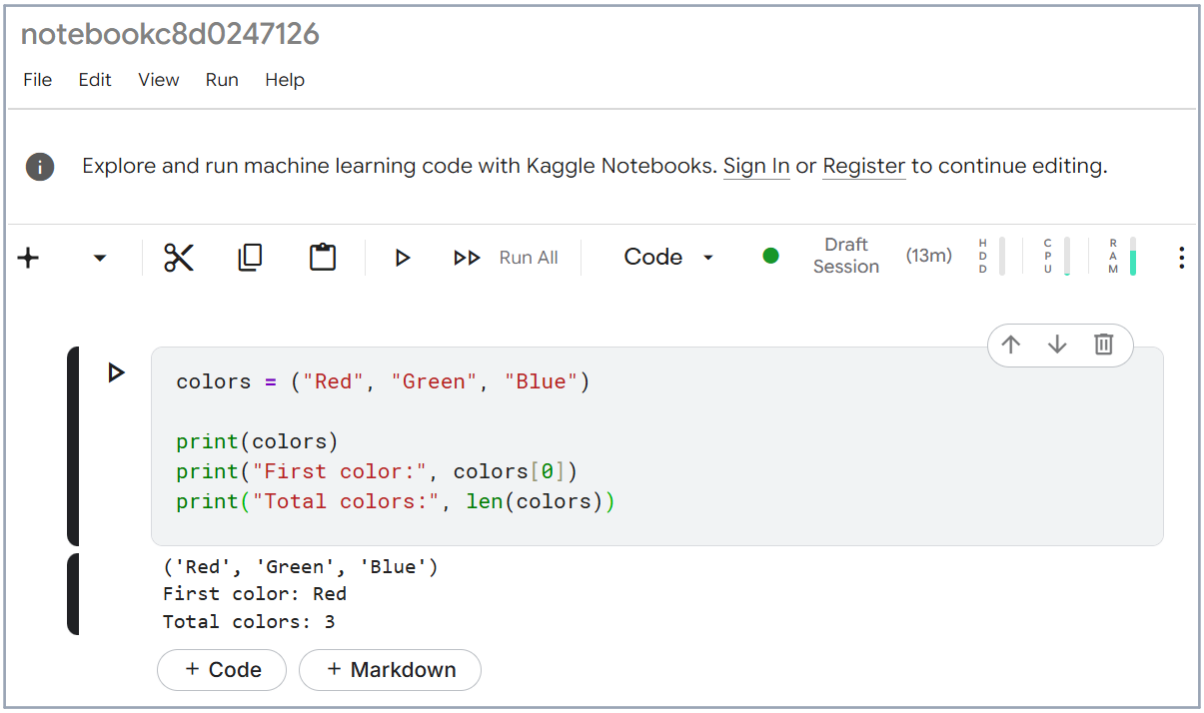

8. While Loop

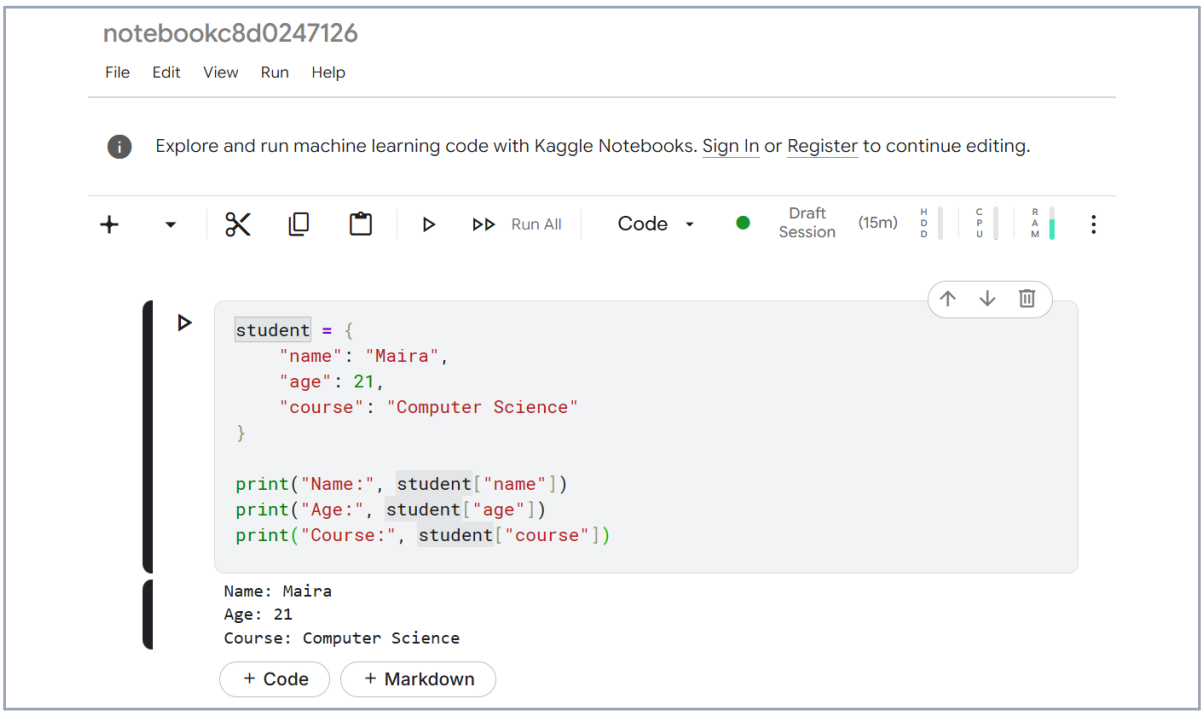

9. Lists

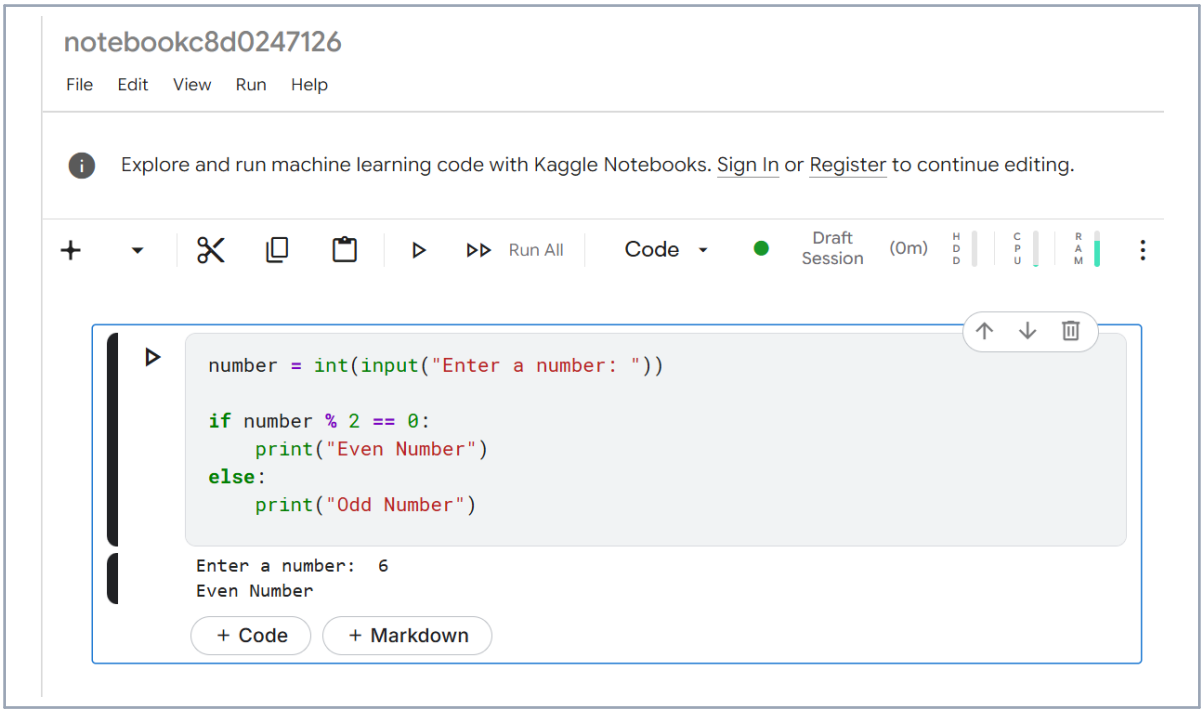

10. Tuples

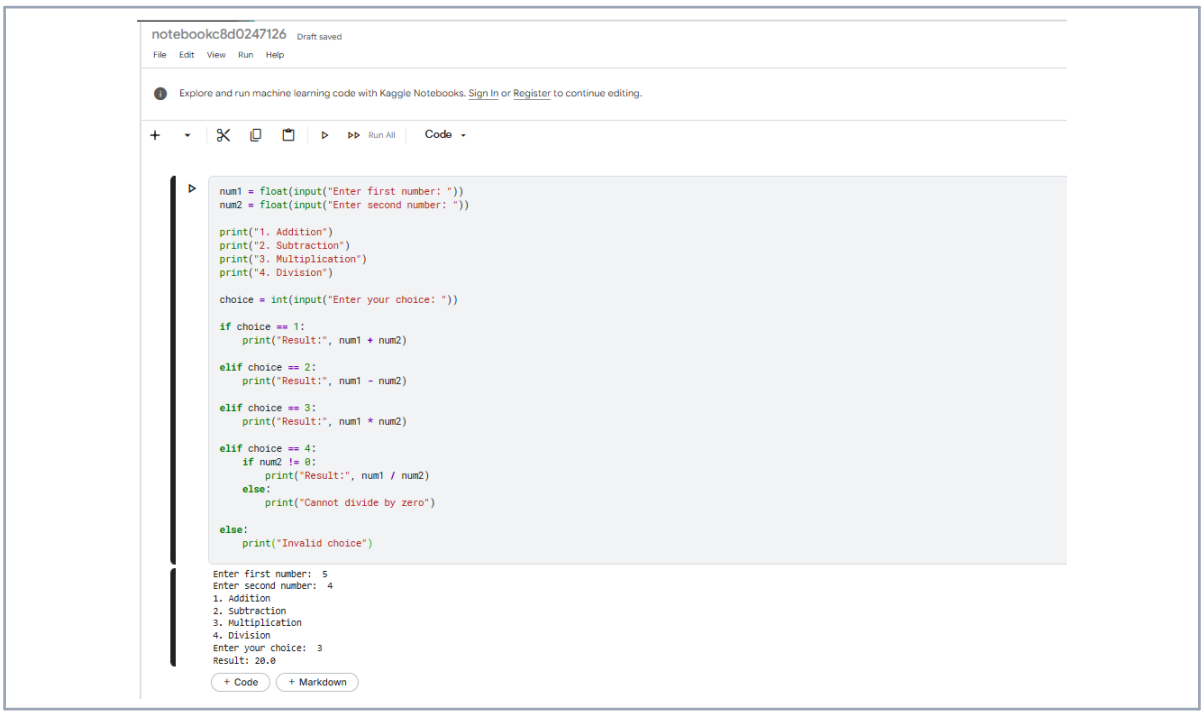

11. Dictionaries

12. Even or Odd

13. Mini Calculator

14. Simple Pattern Printing
